

以ATC分類探討全民健康保險 藥品之利用與分配

高雅慧
國立成功大學醫學院
臨床藥學研究所

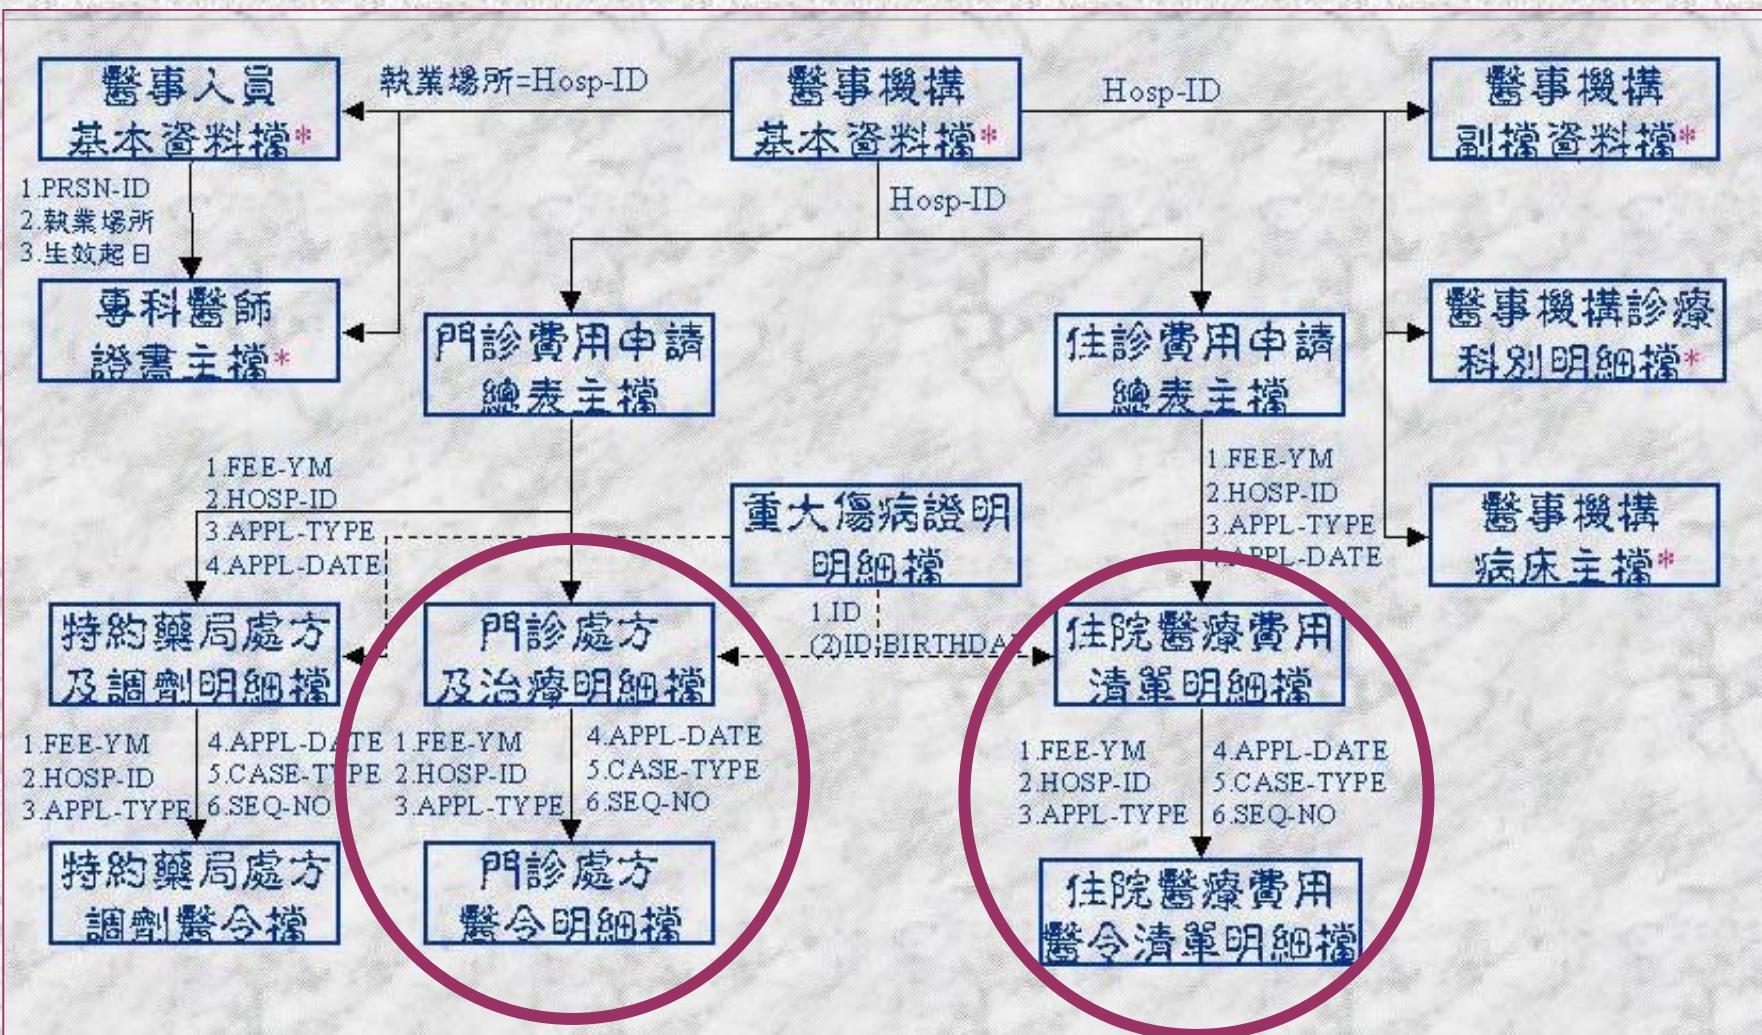

全民健保藥費趨勢

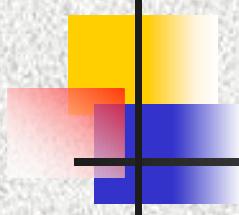

■ 藥費申報金額

◆ 藥費成長率

全民健康保險學術研究資料庫

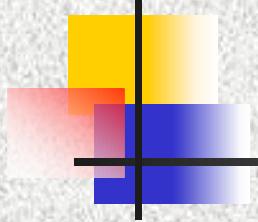

全民健康保險學術研究資料庫

■ 處方及治療明細檔 (CD & DD)

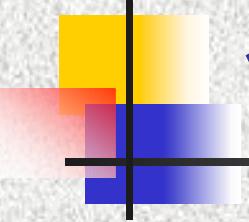

- Date/Sequence number
- Patient ID
- Setting/Specialty/Type of medical services
- Diagnosis/Surgical operation
- Dispensing status
- Physician/Pharmacist ID
- Medical expenditures to claim: drug cost, medical services, consultation fee, pharmacy service fee, etc.

醫療支付的分配

以八十九年為例

- 診察費 + 手術費 = 655億元/年
- 藥事服務費 = 80億元/年
- $655\text{億元}/27876\text{人} = 235\text{萬元}/\text{人}/\text{年}$
- $80\text{億元}/17638\text{人} = 45\text{萬元}/\text{人}/\text{年}$
 - 社區藥局 – 4.2億元/6500人
 - 醫療機構 – 75.5億元/11000人

全民健康保險學術研究資料庫

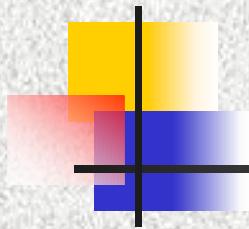

What drug?

- 處方醫令明細檔 (OO &DO)

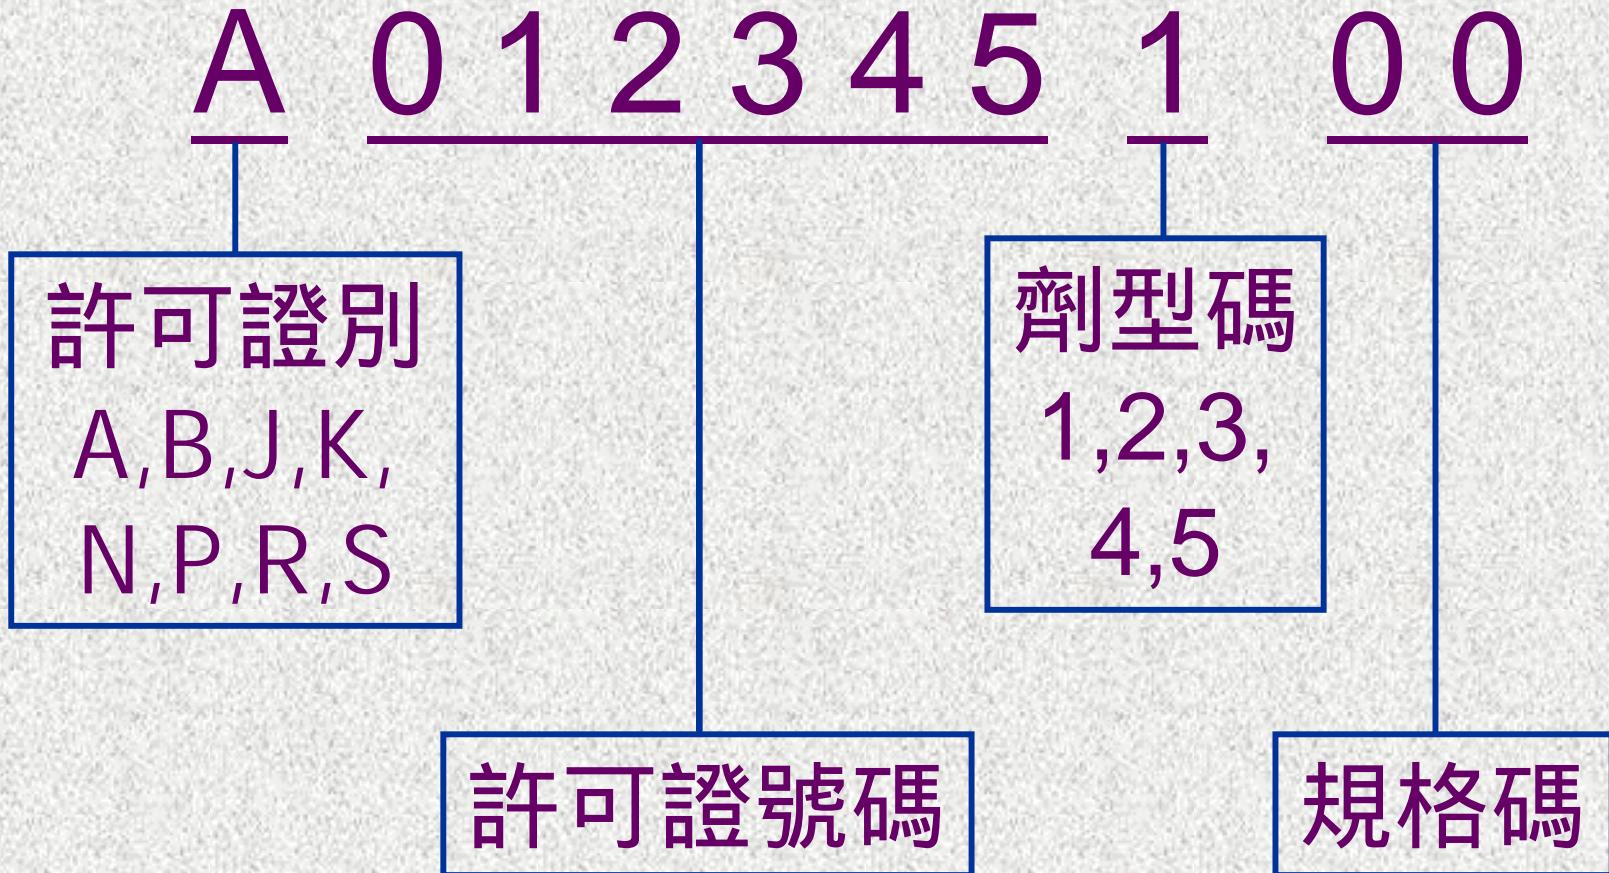

- 識別碼
- 醫令類別
- 藥品代號 – 健保藥品代碼
- 藥品用量 – 藥品一次之劑量
- 藥品使用頻率
- 單價
- 總量
- 金額

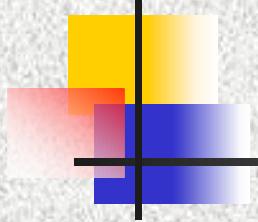

How used?

What cost?

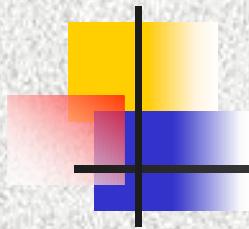

健保藥品代碼

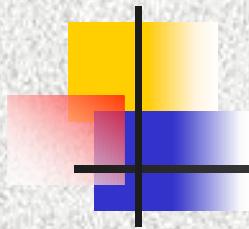

健保藥品 AHFS 分類

- American Hospital Formulary System
- American Society of Health-care System Pharmacists
- 30 Classes in numeric system, e.g.
 - 04:00 Antihistamine drugs
 - 08:00 Anti-infective agents
 - 24:00 Cardiovascular drugs
 - 38:00 Disinfectants
 - 44:00 Enzyme
 - 60:00 Gold compound
 - 86:00 Smooth muscle relaxants

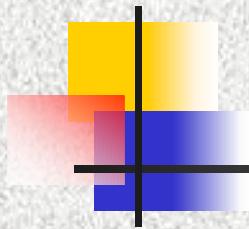

ATC Classification

Anatomical
Therapeutic
Chemical
Classification

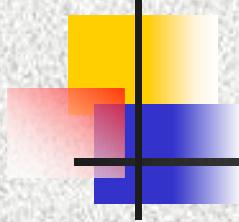

Development

- Drug utilization research by Engel and Siderius, 1968
- Norwegian Medicinal Depot (NMD), 1970
 - ATC classification from the European Pharmaceutical Market Research Association (EPhMRA) classification system
 - Defined Daily Dose (DDD) also developed
- NLN published Nordic Statistics on Medicines using ATC/DDD methodology in 1976

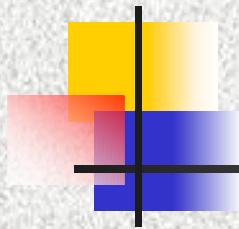

Responsible Organization

- WHO Collaborating Center for Drug Statistics Methodology established in Oslo, 1982
- WHO International Working Group for Drug Statistics Methodology
 - Established by the WHO Division of Drug Management and Policies in 1996
 - Consists of 13 experts in clinical pharmacology, drug utilization, drug regulation, drug evaluation, statistics and medicine

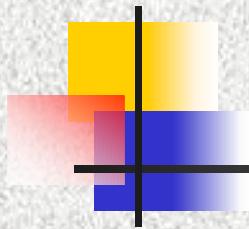

Purpose of the ATC System

- Serve as a *tool* for drug utilization research in order to *improve quality of drug use*
- Presentation and comparison of drug consumption statistics at *international* and other levels
- The ATC/DDD system by itself is not suitable for guiding decisions about reimbursement, pricing and therapeutic substitution

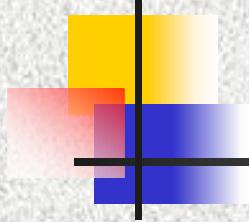

The ATC Classification System

- First level:
 - 14 main organ or system groups
- Second and third levels:
 - Therapeutic/pharmacological
- Forth level:
 - Therapeutic/pharmacological/chemical
- Fifth level:
 - Chemical substance

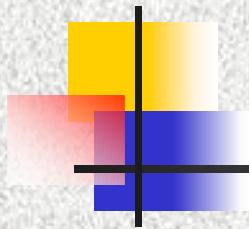

The Main Groups (I)

- A Alimentary tract and metabolism
- B Blood and blood forming organs
- C Cardiovascular system
- D Dermatologicals
- G Genito-urinary system and sex hormone
- H Systemic hormonal preparations, excl. sex hormone
- J General anti-infectives for systemic use

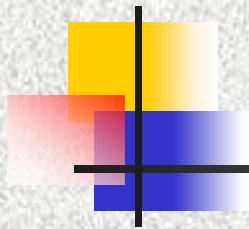

The Main Groups (II)

- L Antineoplastic and immnomodulating agents
- M Musculo-skeletal system
- N Nervous system
- P Antiparasitic products, insecticides and repellents
- R Respiratory system
- S Sensory organ
- V Various

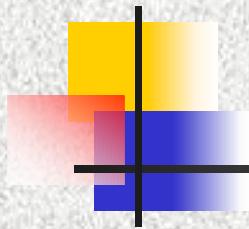

Example

- A Alimentary tract and metabolism
(1st level, anatomical main group)
- A10 Drugs used in diabetes
(2nd level, therapeutic main group)
- A10B Oral blood glucose lowering drugs
(3rd level, therapeutic/pharm. group)
- A10B F Alpha glucosidase inhibitors
(4th level, chem./therap./pharm. group)
- A10B F01 Acarbose
(5th level, subgroup for chemical substance)

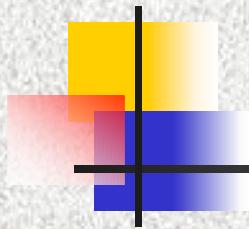

ATC vs. AHFS

- For pharmaceutical classification by WHO
- Broader coverage of pharmaceutical products
- 5 structured levels
- Combination ingredients applicable
- For drug information compilation by ASHP
- US marketed products
- 3 levels, inconsistent, skewed structure
- Combination ingredients not applicable

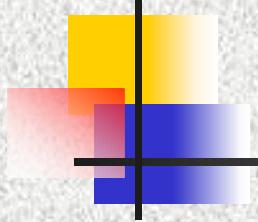

AHFS Unclassified Drugs

- Alendronate
- Allopurinol
- Amantadine
- Azathioprine
- Bromocriptine
- Calcitonin
- Clomiphene
- Clodronate
- Cyclosporin
- Etidronate
- Flumazenil
- Leucovorin
- Glucosamine
- Ketoprofen
- Ketotifen
- Levodopa
- Lithium carbonate
- Piracetam

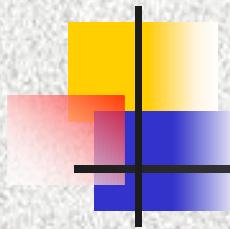

Example: Cardiovascular Drugs

C01	Cardiac therapy	24:04	Cardiac drugs
C02	Antihypertensives	24:06	Antilipemic agents
C03	Diuretics		
C04	Peripheral vasodilators	24:08	Hypotensive agents
C05	Vasoprotectives		
C07	Beta blocking agents	24:12	Vasodilating agents
C08	Calcium channel blockers		
C09	Agents acting on the renin-angiotensin system	24:16	Sclerosing agents
C10	Serum lipid reducing agents	40:28	Diuretics

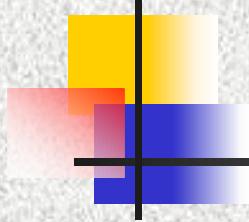

Drug Utilization Studies

- How is the NHI pharmaceutical subsidy classified by ATC system?
- Quantitative studies
 - Pattern of drug utilization in NHI claim data
 - Utilization analysis of NSAIDs
 - Exclusion from reimbursement
- Qualitative studies
 - Assessment of potentially inappropriate prescriptions with lethal drug-drug interactions

NHI Formulary: Main system

Alimentary tract and metabolism	3310
General antiinfectives for systemic use	2582
Respiratory system	2518
Nervous system	2077
Dermatologicals	1824
Blood and blood forming organs	1722
Musculo-skeletal system	1625
Cardiovascular system	1531
Genito-urinary system and sex hormones	833
Systemic hormonal preparations, excl. sex hormones	661
Sensory organs	459
Antineoplastic and immunomodulating agents	401
Antiparasitic products, insecticides and repellents	193
Various	127

資料處理流程

處方及治療明細檔 (CD&DD 檔; NHRI sampled)

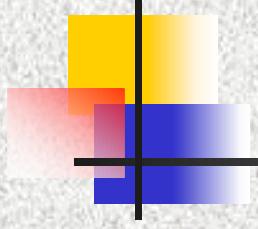

1. Acode、ICD-9除錯
2. 扣除中牙醫之案件及就醫科別
3. 扣除casetype = 71~73 、 81 、 91

與處方醫令明細檔 (OO&DO 檔) 聯結
，依識別碼合併治療明細及處方醫令

與健保藥品ATC編碼檔聯結，
使藥品健保碼對應其ATC code

資料處理流程（續）

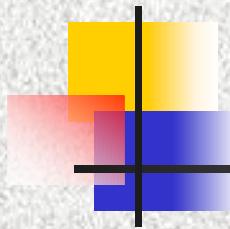

與醫事機構基本資料檔（HOSB檔）
聯結，依醫事機構代號歸併其層級別

依ATC code分析

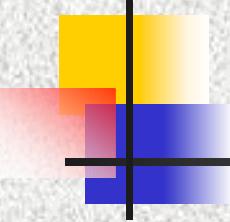

1. 各藥品類別之使用頻次與金額
2. 各層級之使用頻次與金額
3. 就門診用藥找出不適當之藥品併用

AHFS分類之申報金額統計 (88)

Code	AHFS藥理分類名稱	88年申報金額	%	88成長率
24	心臟血管藥物	12,202,035,740	19.30	18.66
08	抗感染劑	10,313,193,724	16.31	12.89
28	中樞神經系統藥物	8,530,703,878	13.49	15.75

Exclusions from Reimbursement – UK Experiences

- **Automatic reimbursement until 1985**
- **10 more categories excluded from 1992**
 - Antacid, antidiarrheals and laxatives
 - Anti-allergies, Cough and cold remedies
 - Appetite suppressants
 - Minor analgesics, topical skin and anti-rheumatic products
 - Products for ear and nose infections and of the vulva and vagina
 - Vitamin and anti-anaemics
 - Hypnotics and anxiolytics
 - Oral contraceptives

Ketoconazole + Warfarin	1	0	0
Troleandomycin + Terfenadine	9	21	17
Troleandomycin + Astemizole	9	5	3
Itraconazole + Terfenadine	5	6	0
總計	518	664	580

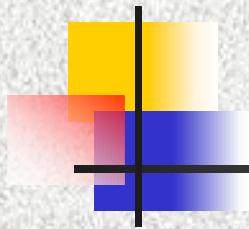

Drug Utilization Studies

- The marketing, distribution, prescription and use of drugs in a society, with special emphasis on the resulting *medical, social, and economic* consequences.

~ WHO, 1977

- Health authorities
- Pharmaceutical industry
- Clinical professionals
- Academics in public health, social sciences, economy
- Consumers

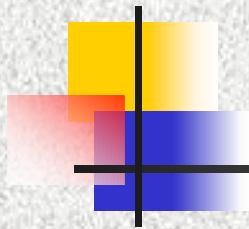

Problems

- Hidden use of drug
- Unit of measurement
 - Defined daily dose
- Incomplete diagnosis link
- Validity of the data
